

Data you can trust.

Integrate quality rated vital signs streamed from one single in-ear device.

c-med° alpha

The c-med° alpha is a class IIa* medical measuring device that generates continuous data streams of three important vital signs:

- Core Body Temperature
- Heart Rate
- Blood Oxygen Saturation (SpO2)

Raw data is acquired in the outer ear canal and is then processed on the device itself. The calculated vital signs data is transmitted via Bluetooth 5.0. The c-med° alpha is a wearable sensor fusion of two frequently used medical measuring devices.

SpO2
98%
Perfusion: 0.0

? Unreliable signal

SpO2

Perfusion: 1.6

✓ Reliable signal

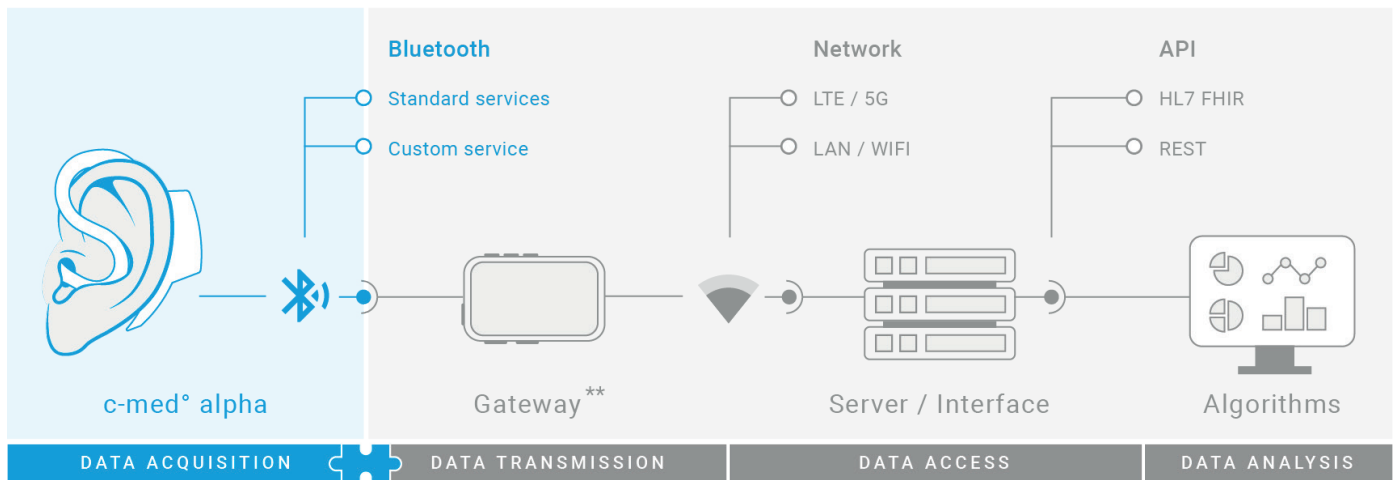

QUALITY RATED

Focusing on the generation of reliable data streams, unique algorithms detect and flag invalid sequences in vital signs data. Thus you can see at any time whether a measurement is to be trusted or not.

Heart rate and SpO2 are accompanied by their own quality ratings, the Quality and Perfusion, turning mobile vital signs into data for decision making.

cosinuss°

Example IT-Infrastructure*

* Complete RPM-ecosystem can be provided by cosinuss°

** Gateways can be smartphone apps, smartwatches or client computers

INTEGRATION

Connecting to the Internet of medical things (IoMT).

Wherever and whenever – the vital signs data acquired can be seamlessly integrated into any IT-ecosystem with full transparency allowing you to access, further process and act in real-time.

The Bluetooth standard services offer an easy and safe integration for the data stream including three calculated vital signs and device information needed. With that, the c-med° alpha offers a wireless data transmission of vital signs data in compliance with medical standards.

An additional custom Bluetooth service enables advanced characteristics such as high-resolution data streaming and individual device configuration on the fly.

INFRASTRUCTURE

cosinuss° IoMT

A full IoMT infrastructure or parts of it can be provided by cosinuss° as well: The cosinuss° LabSystem consists of a gateway solution, a server with a web based and other standardized interfaces as well as additional analytics.

SUPPORT

Learn, share and build.

cosinuss° offers technical documentation and in-person support for a successful integration and user training.

SPECIFICATIONS

Bluetooth 5.0 standard services

Standard Services	16-bit UUID
Device Information	180A
Generic Access	1800
Generic Attribute	1801
Battery Service	180F
Secure DFU Service	FE59
Health Thermometer	1809
Heart Rate	180D
Pulse Oximeter	1822

Additional custom service

Additional to the standard services a custom service is used to achieve high-resolution data streaming and individual device configuration on the fly.

Data transmission

Type	Bluetooth 5.0
Frequency	ISM band 2.4 – 2.485 GHz
Transmitting range	Approx. 10 m
Transmitting interval	Configurable, Standard 1 Hz (every second)

General

Size, H x W x D	5.5 x 5.8 x 1.0 cm
Weight	7 g
Material	Silicone rubber, medical grade
Protection type	IP 47
Disinfection	Temporary alcohol immersion
Medical classification	Ila, *certification expected in Q1 2022
Certificates	Medical CE, FCC, Bluetooth®

Battery

Type	Lithium, rechargeable
Run time	24 hours (measuring every 5 minutes)
Charging time	1 hour

Vital Signs accuracy

Body Temperature	± 0.3 °C
Heart Rate	± 2 bpm
SpO2	± 4 %

COMPANY PROFILE

Cosinuss GmbH is a certified medical devices manufacturer based in Munich specializing in mobile & continuous monitoring of several vital parameters. With more than 15 years of research and development, numerous patents and medically certified products, cosinuss° is a pioneer in the field of mobile & continuous monitoring. Following the vision to contribute to the change of health care into a flexible and extended organization by improving the diagnosis, treatment and rehabilitation of patients.
